Work Experience

Modrokkr, New York, NY   May '18 – Present
Software Engineer/Full Stack
- Work closely with the engineering team to meet product requirements, goals, and desired functionality
- Proactively test the Modrokkr website and provide recommendations to achieve optimal user experience across all browsers and electronic platforms
- Built and implemented a tool to facilitate game creation and modification, allowing the utilization of personally uploaded projects and already available Modrokkr assets
- Redesigned sections of the website and added additional features to ensure a more attractive and efficient user experience

Moses Center for Students with Disabilities @ NYU, New York, NY   Sep '17 – Dec '17
Alternative Media Technician
- Transformed reading materials into a variety of formats of accessible media to accommodate students with disabilities
- Scanned, edited, and proofread educational documents to ensure accuracy, clarity, and consistency
- Used Omnipage and MS Word with CAT integration and MathType to format documents for processing

Projects

JobsUp   Feb '17 – Apr '17
- Collaborated in a three-person team and served as the front-end developer and project manager
- Developed and designed a website to search for jobs based on geographical location and interests
- Communicated with team members periodically to keep updated on the project development process
